Deadline for manuscript submissions:

15 May 2020

Message from the Guest Editor

Despite decades of research, much of which has focused on animal studies, humans continue to suffer from a multiplicity of diseases for which there are no treatments. It is now clear that insights from animal studies frequently fail to translate to humans, explaining the very high failure rate observed when new medicines are evaluated in clinical trials. In addition, there is evidence that animal studies are frequently conducted poorly, meaning that no clear conclusions may be drawn from them. Some claim that if the quality of animal studies was improved and animal models more faithfully captured the relevant human disease, then these models would deliver clinical benefits. Others argue that we need to focus on humanrelevant research, pointing to developments in human biology that have yielded in vitro and in silico techniques capable of providing novel insights into human disease mechanisms, as well as human-relevant disease models. for drug development. A key question is whether there is value in refining animal models, or whether these should be relinguished in favour of human-focused approaches. Original manuscripts addressing this point are invited for this special issue.

Message from the Editor-in-Chief

Animals is an online open access journal that was first published in 2011. Animals adheres to rigorous peer review and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal welfare, animal ethics and animal science. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science and received the latest Impact Factor of 1.832. The journal ranks 11/61 (Q1) in the category 'Agriculture, Dairy & Animal Science' and 29/141 (Q1) in 'Veterinary Sciences.'

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science) from Vol. 5 (2015), Zoological Record (Web of Science) and Scopus (2018 CiteScore: 2.21). Citations available in PubMed, full-text archived in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2019).
